

DID YOU KNOW?

Spring is the perfect time to give your BBQ a Tune-Up.

Make this 3-step safety check part of your spring “Tune-Up”

- 1. CLEAN: use a pipe cleaner or wire to make sure the burner ports, and venturi tubes are free of rust, dust, dirt, spider webs or other debris.***
- 2. CHECK: examine the hose leading from the fuel supply to the burners. Replace if cracked or damaged.***
- 3. TEST: find leaks by applying a 50/50 solution of water and dish soap to all fuel and hose connections. If bubbles appear, tighten the connections and/or replace the damaged parts and always re-test.***
- 4. Make sure your home has working Carbon Monoxide alarms outside all sleeping areas.***
