Industrie 2030

Manufacturing Growth, Innovation and Prosperity for Canada

Georgian

Industrial Mechanic, Industrial Electrician and Welder Pre-Apprenticeship Training Program

Are you 18 years of age or older, a Canadian citizen or a landed immigrant, and not already registered as an apprentice?

This program may be for you!

Our program offers academic upgrading, job readiness skills, and trade readiness experience.

Admissions Procedures

Submit application form and resume —

The application form is available from Georgian College — Midland Campus.
When submitting, please attach a current resume.

Attend an assessment session —

All applicants will be asked to attend a session to assess levels in English and math.

Attend a personal interview —

All candidates will be asked to attend a personal interview.

Ensure you have the following —

Any references or recommendation from employers or instructors in a related field and your resume. A valid driver’s license would be an asset.

START DATE

May 13, 2019

APPLICATION DEADLINE

April 27, 2019

MP Jill Dunlop / Skilled Trades briefing, EDCNS

Excerpt, 1st Session, 42nd Parliament, 26 July 2018

... labour a competitive advantage for Ontario and meet the requirements of a growing and vibrant economy in Ontario.

The Economic Development Corporation of North Simcoe (EDCNS) strongly believes high-speed Internet is essential for advancing our local economies, quality of life and the sustainability of our communities. Our municipal partners – Town of Midland, Town of Penetanguishene, Township of Tiny, and Township of Tiny – along with Beaudry First Nation and the North Simcoe Community Futures Development Corporation have established a broadband gas analysis (BGA) to identify the gaps in existing service areas, the bandwidth available in unserved areas and to also identify clusters of demand for the service in areas under and unserved areas. As a result of the analysis we have now received a clearer picture of the current state of broadband infrastructure within North Simcoe – mapping of the existing bandwidth capacity by gaps in all areas, and the mapping of demand based on population data and “self-identified” customers in a Geographic Information System (GIS).

The BGA has identified that while there are some populations that have reasonably good service, by far the majority of residential and commercial properties in the area do not currently have access to high-speed Internet, and this remains a barrier to economic development. This means that many rural and remote regions in Canada lack the infrastructure needed to participate in the digital economy.

EDCNS agrees with the GAC that a well-developed broadband infrastructure is critical for governments to participate in the digital economy and that a mix of public and private investments are required to deliver affordable, high-speed Internet access to all regions. The GAC believes that the most efficient and reliable way to deliver broadband service is through the existing infrastructure of private Internet service providers.
**Funding and Grants**

**EDCNS Program Funds**

- 2019: $80,000 HGB
- $26,000 AGRI/HC
- $10,000 MFG
- $80,000 Attraction
- **TOTAL $196,000**
