

THE CORPORATION OF THE
TOWN OF MIDLAND

**NOTICE OF CHANGE TO THE SEPTIC SYSTEM MAINTENANCE
INSPECTION PROGRAM**

TAKE NOTICE that the Council of the Town of Midland revised the Septic System Maintenance Inspection Program to include only the mandatory areas as required by the Building Code Act on August 25, 2014.

A copy of the by-law and an information package is available on the Town website and at the Planning and Building Services counter at the Town office.

All properties with a septic system within 100 metres of Georgian Bay and Little Lake will be subject to this inspection up to and including systems installed after 2009. All information collected at the time of inspection, in addition to information in our files, will be placed in a common database for future use.

The co-operation of all property owners will ensure that this program be completed in a prompt and efficient manner, and assist in providing continued enjoyment of a clean and healthy environment.

Any person wishing further information or clarification with regard to the program should contact the Planning and Building Services Department at (705) 526-4275, extension 2252.
