

DID YOU KNOW?

A LEADING CAUSE OF CLOTHES DRYER FIRES IN HOMES IS THE LACK OF MAINTENANCE!

- FOLLOW THE MANUFACTURER'S INSTRUCTIONS REGARDING THE SAFE USE, AND MAINTENANCE OF YOUR DRYER.
- INSPECT AND CLEAN THE LINT SCREEN AFTER EACH LOAD OF LAUNDRY.
- REGULARLY REMOVE LINT FROM METAL DUCTS AND EXHAUST VENTS.
- *THE INSIDE OF THE DRYER CABINET SHOULD BE CLEANED AS PER MANUFACTURER'S INSTRUCTIONS.*
- *KEEP THE AREA AROUND YOUR DRYER CLEAR OF ITEMS THAT CAN BURN.*
- *DO NOT OVERLOAD YOUR DRYER.*
- *DO NOT DRY MATERIALS OR FABRICS THAT HAVE BEEN SATURATED BY CHEMICALS, OILS, GASOLINE, OR OTHER FLAMMABLE LIQUIDS.*
- *USE RIGID OR FLEXIBLE METAL DUCTING FOR VENTING TO THE OUTDOORS. PLASTIC OR METAL FOIL DUCTS ARE MORE PRONE TO KINKING, SAGGING AND CRUSHING, WHICH LEADS TO LINT BUILD-UP.*
- *INSTALL A CARBON MONOXIDE ALARM ADJACENT TO ALL SLEEPING AREAS IN YOUR HOME IF USING A NATURAL GAS OR PROPANE DRYER.*
- *ENSURE THERE ARE WORKING SMOKE ALARMS ON EVERY STOREY OF YOUR HOME AND OUTSIDE ALL SLEEPING AREAS.*
