

Notice of Completion

Town of Midland Waterworks Master Plan Update

The Town of Midland initiated an update to the existing Waterworks Services Master Plan (2013) to reflect growth in the community, planned development, and operational changes and to generally provide a comprehensive water servicing infrastructure plan for the community for the next 20 years. Following the completion of two Public Information Centres and the receipt of input from interested parties, the Town of Midland has completed the update and selected the Preferred Strategy to address water servicing deficiencies in the community.

The following projects form part of the Recommended Strategy and will be implemented using a phased approach. For a complete list of projects please refer to the Water Servicing Master Plan document available on the Town's website:

- Short Term Projects (1-5 years) include upgrades to the Everton Booster Pump Station (Alt. 3C), abandonment of Well 12 & Well 1A (Alt. 2A), and the twinning of the Harbourview Drive Watermain (Alt. 5A) (all Schedule A/A+) and upgrades to the Hanly St. Booster Pump Station (Alt. 3A) (Schedule B).
- Mid-Term Projects (5-10 years) include the development of a new South Pressure Zone with new Booster Pump Station and associated watermain (Alt. 4A) and new storage in the East Pressure Zone (Alt. 1A) (both Schedule B).
- Long Term Projects (15-20 years) include the decommissioning of the Dominion and Montreal Storage Tanks and a new trunk watermain on Highway 93 for the West Zone (Alt. 4B) (all Schedule A/A+). Schedule B projects include the commissioning of the Sundowner Well (Alt. 2A) and construction of a new Booster Pump Station at Balm Beach Road.

This undertaking was completed in accordance with the *Municipal Class Environmental Assessment (Oct. 2000, as amended 2007, 2011 & 2015)* with the intent of addressing Phases 1 and 2 of the Class EA process (Approach #2) thereby fulfilling the requirements for the Schedule 'A', 'A+', and select 'Schedule B' projects identified within the document. Following the completion of this Master Plan Update the Town may proceed with implementation of the pre-approved Schedule A and A+ projects and the Hanly St. Booster Pump Station upgrades (Schedule B) subject to funding and the receipt of necessary approvals. The identified mid-term and long-term Schedule B projects will require additional study to fulfill MCEA requirements prior to implementation.

By this notice the Waterworks Master Plan Update document is being placed on the public record for a 30-day public review period ending July 30, 2021. A digital copy of the Master Plan Update is available on the Town of Midland's website at www.midland.ca/WMP. If you would like a copy in an alternate format, please contact either of the team members noted below. Interested persons should submit written comments to either of the following team members within 30 calendar days from the issue date of this notice:

Andre Pepin

Acting Manager of Water & Wastewater Services
Town of Midland
200 Bay Street
Midland, ON L4R 1J5
Tel: 705-526-4268 Ext. 4224
Email: aepin@midland.ca

Andrea Potter, B.E.S.

Senior Environmental Planner
AECOM
55 Cedar Pointe Drive, Suite 620
Barrie, ON L4N 5R7
Tel: 705-797-3278
Email: andrea.potter@aecom.com

In addition, a request may be made to the Ministry of the Environment, Conservation and Parks (MECP) for an order requiring a higher level of study (i.e. requiring an individual/comprehensive EA approval before being able to proceed), or that conditions be imposed (i.e. require further studies), only on the grounds that the requested order may prevent, mitigate or remedy adverse impacts on constitutionally protected Aboriginal and treaty rights. Requests on other grounds will not be considered. Requests should include the requester's contact information and full name and should specify what kind of order is being requested (i.e. request for additional conditions or a request for an individual/comprehensive environmental assessment), indicate how an order may prevent, mitigate or remedy potential adverse impacts, and include any supporting information to assist the ministry in efficiently initiating their review. The request should be sent in writing or by email to the following and be copied to the above noted team members:

Minister of the Environment, Conservation and Parks

Ministry of Environment, Conservation and Parks
777 Bay Street, 5th Floor
Toronto ON M7A 2J3
minister.mecp@ontario.ca

Director, Environmental Assessment Branch

Ministry of Environment, Conservation and Parks
135 St. Clair Ave. W, 1st Floor
Toronto ON, M4V 1P5
EABDirector@ontario.ca

Any input received during this process will be maintained on file for use during the project and may be included in project documentation. Information collected will be used in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record.

This notice issued June 24, 2021.
