

Notice of Construction

Tatham Engineering and the Town of Midland are pleased to provide the following information and details to residents and business owners regarding the status of the Yonge Street Reconstruction project.

Project Location & Objective

Residents and business owners in Midland and the surrounding area are advised that the Town of Midland's contractor is remobilizing to complete the reconstruction of Yonge Street between King Street and Norene Street.

Project Details

Macon Construction will be remobilizing on May 4, 2026, to complete the remaining works from King Street to Norene Street. The remaining work includes;

- Concrete sidewalk replacements;
- Surface course asphalt;
- Pavement markings;
- Restoration including topsoil and sod.

The above work is anticipated to be completed within the month of May 2026. Please note this schedule is subject to change based on several factors including inclement weather, unforeseen conditions, additional work required, the contractor's ability, etc. Tatham Engineering and the Town of Midland will endeavor to keep residents aware of major schedule changes, should they arise.

Site Safety

Construction involves the use of heavy equipment and the unavoidable creation of obstacles and possible hazards (excavations, etc.).

These circumstances are often attractive to children, and as such, we ask that you caution your children to stay clear of the working area. If they must walk by the construction activity, small children should be accompanied by an adult.

The contractor is required to conduct the work in a safe manner, including fencing of deep excavations, if required. We ask that you take extra caution during the construction period to ensure everyone's safety.

Property Access

Yonge Street will remain open throughout construction, traffic control measures will be utilized and delays should be anticipated.

Driveway access throughout the construction area will typically be maintained to the extent possible. If vehicular access is restricted for more than 24 hours, the contractor will provide notification at least 24 hours in advance.

Driveway access may be restricted during the installation of sidewalk to maintain the integrity of the work. Restrictions may be in place for up to 3 days, following which access will be restored as quickly as possible. We ask for your patience in such instances.

Homeowners are urged to find alternative parking arrangements while construction is occurring near their property.

Emergency access will be maintained at all times.

Accessible Accommodation

If you require accommodations for wheelchair access, home care visits, etc. please contact the Contract Administrator for assistance in ensuring any resulting implications can be minimized.

Property Impacts

Vibration from construction should be expected. Homeowners should remove valuables and pictures from walls.

Garbage, Recycling & Composting

On the normal collection day, place all garbage, recyclable, compost and/or yard waste materials at the front of your property as usual. The contractor will transfer these items outside of the construction zone for pickup if required. Please mark your address clearly on your applicable containers so they can be returned to the correct address by the contractor.

It is very important that you take your materials to the front of your property by 7:00 AM. Otherwise, they might not be picked up.

Utility Interruptions

Bell and Rogers services may be impacted during by construction. Should you experience any service disruption, please inform the contractor accordingly. The contractor will work together with the service providers to ensure any required repairs are completed in a timely manner.

Gas and hydro services should not be affected by construction, barring any unforeseen circumstances.

Boulevard Restoration

Disturbed boulevards will be restored with topsoil and sod. We urge all homeowners to refrain from parking on or disturbing the fresh sod until the root systems are established.

Homeowners should remove private landscape features within the right-of-way prior to construction.

Project Contacts

Maacon Construction Corporation continues their existing Contract with the Town of Midland to complete the work and Tatham Engineering will be administering the Contract. If you have any questions regarding the construction, please call during the hours of 8:30 am to 5:00 pm, Monday to Friday. Damages should be reported to the contract administrator or contractor as soon as possible.

If you have any questions or concerns of a general nature, please contact Tatham Engineering. For emergency calls after hours , please contact Jake Jeannotte.
