

Town of Midland Active Transportation Map

From The Midland Active Transportation Committee

Active transportation uses human energy. This means activities like walking, rollerblading and cycling. You can use it every day to go to work, school, shopping, parks or to visit friends. For longer trips, you can use public transit too.

The Town of Midland is always working to make cycling paths, trails and transit better. Active transportation can be part of your daily life.

Enjoy our trails and active transportation routes. Please be considerate of others on multi-use trails.
